Physics and algebra reference

The following displayed equations define familiar physical relationships.

$$E = mc^2$$

$$v = \frac{d}{t}$$

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

These equations should retain powers and fraction structure in the output.

Text, code, and table controls

Set mode = safe before startup; this sentence is explanatory prose.

The expression a = b appears inside a sentence, not as a displayed formula.

```
def energy(m, c):
    result = m * c ** 2
    return result
```

Quantity	Value
